Professional Summary

Highly skilled MuleSoft and Salesforce Developer with proven experience in designing, developing, and deploying robust integration solutions and Salesforce applications. Proficient in utilizing MuleSoft Anypoint Platform and Salesforce tools to streamline business processes and enhance data flow. Strong background in API development, data integration, and Salesforce customization.

Education

B.E in ECE – Panimalar Institute of Technology and Science (CGPA: 6.79, 2020).

Professional Experience: Salesforce Skills

Cloud Champ Technologies

[15/07/2024] – Present

- **Lightning Flows:** Designed advanced Lightning Flows to automate business processes efficiently.
- **User Security Management:** Configured profiles, roles, and permission sets for secure access control.
- **Reports & Dashboards:** Created interactive reports for real-time data visualization.
- **Data Management:** Managed data imports and exports with Data import wizard and Data Loader.
- **Apex Programming:** Developed triggers, batch processes, and custom controllers for optimized automation.
- **SOQL & SOSL:** Wrote efficient queries to retrieve and manipulate Salesforce data effectively.
- **Lightning Web Components (LWC):** Built high-performance, reusable UI components for Salesforce applications.
- **API Integrations:** Integrated Salesforce with third-party applications using REST and SOAP APIs.
- **Java:** Applied object-oriented principles for scalable and maintainable solutions.

MuleSoft and Salesforce Developer

Conflowence

[01/11/2023] – [30/06/2024]

Developed and maintained MuleSoft integrations using Anypoint Studio, ensuring seamless data flow between various enterprise applications.

Implemented robust API solutions using APIKit and DataWeave, enhancing data transformation and integration capabilities.

Designed and deployed Salesforce applications using Lightning, Apex, and Visualforce, improving user experience and business efficiency.

Utilized GitHub commands for Pushing and Make Pull Request to the GitHub Repository. CI/CD Pipeline(Jenkins and GitHub Workflow Actions).

Conducted unit testing using MUnit and Apex Test classes to ensure high-quality and reliable code.

Collaborated with cross-functional teams to gather requirements and deliver scalable integration solutions.

Optimized Salesforce performance by tuning SOQL queries and implementing best practices for data management.

Provided technical support and troubleshooting for production issues, ensuring minimal downtime and smooth operations.

Certifications

- MuleSoft Certified Developer
- Salesforce Certified AI Associate
- Salesforce Certified AI Specialist

Technical Skills:

Languages : DataWeave, RAML, SQL, SOQL.

Tools : AnyPoint Studio, AnyPoint Platform, Postman, GitHub, PowerBI, Salesforce.

Projects

Snowflake and Salesforce Integration (MuleSoft):

- Creates a Data in Snowflake database which was provided by the Team Lead using queries.
- After creating the in the database using Anypoint Studio connect with the snowflake database using snowflake connectors which is Anypoint Studio.
- Create a Salesforce developer account, generates the security key to connect with the Salesforce with the help of Salesforce Connector in Studio.
- Change data Capture (CDC) from snowflake to push the data to Salesforce by creating the custom fields and objects according to the data from Snowflake.
- Using the logic and appropriate connectors like choice router and transform message connectors etc. to avoid repetitive data occurs in snowflake records into the Salesforce.
- Have to generate required security key and passwords to protect the data to breach from both snowflake and salesforce.

Certificates

- Data Analytics & Machine Learning Engineer – Imarticus Learning.
- Salesforce Developer (Apex, LWC, VisualForce).
- Preparing Data for Analysis.
